

BEWARE MacBIGFOOT

The human-like creature ran at up to 70 mph

A BIGFOOT creature "running at 70 miles an hour" terrified a family of five when they spotted it in a Scottish forest.

The 6ft-tall beast had a human-like face which "contorted into a snarl" when it realised it was being watched.

The family were shocked and disturbed by their close encounter. Now the father has told about the incident which, he said, happened as he drove his wife and three children at night alongside Knock Forest in the Bathgate Hills, West Lothian.

He said: "It was about ten at night when I approached a dangerous bend and my attention was drawn to my right by a sudden burst of movement. What

Family's fear as they sight snarling beast

by SCOTLAND TODAY REPORTER

had caught my eye was a running figure of humanoid shape.

"It was moving at such a speed that I was left with only the image, as if frozen, in my mind's eye. It's ap-

pearance was that of a bright negative against the dark background of the forest.

"You could see through it... just like it was a negative of a film."

He added: "It was approximately six feet tall and appeared extremely unhappy that we had disturbed it.

"It had a human-like face, contorted into a snarl, which was directed back at us as it sped effortlessly through the trees.

Speed

"I reckon this thing was running between 50 and 70 miles per hour."

The man, a prison officer from Bathgate, wants to remain anonymous for fear that he will get his leg pulled at work.

But he remains adamant about what he and his family witnessed.

In a letter to Flying Saucer Review, he wrote: "Since I saw the creature I have been back time and again to try to see if I could see it again or re-create conditions which might have caused an optical illusion.

"I am not a crank. I believe myself to be perfectly rational but I cannot explain what I saw in reasonable terms."
